I think it is time the government got on with other problems and left Microsoft alone, it is a wonderful company and does so much for so many people and yet a few Democrats cant let it go. How much is this costing us for them to keep after Microsoft. You did it to A.T.T. many years ago and that has been a mess ever since, why is it when anyone in this country is successful the goverment steps in and ruins it. some of these people need to get a life there are so many people that need help right now why not concentrate on them.
